Who we are?

At SWISS PHARMA , we understand the dedication, discipline, and hard work that go into achieving peak physical performances and are meticulously designed to meet the specific needs of top-tier athletes. Our diverse product line is expertly crafted to address the varied requirements of our clientele. Each Swiss Pharma product is developed with the utmost adherence to quality and ethical standards, ensuring that you receive a product that embodies the pinnacle of active principles and unparalleled quality globally.

We are committed to excellence, reflected in our product design and packaging standards, aiming to deliver one of the most outstanding selections of anabolic steroids in the market.

Our laboratory specializes in the formulation, analysis, and innovation of new products, under the guidance of experts . By integrating cutting-edge innovation, we develop products tailored to enhance the performance and achieve goals with our advanced pharmaceutical solutions.

TRENBOLAN ACETATO

- Formula : $C_{20}H_{24}O_3$
- Molecular Mass : 312.4 g/mol
- Active Half-Life : 3-4 Days
- Anabolic Activity : 500%
- Androgenic Activity : 500%
- Dosage : 300-500mg per week

Trenbolone Acetate is an exceptionally fast-acting version of one of the most potent steroids ever created. It is highly prized for enhancing muscle hardness and definition while boosting strength, all without causing unwanted water retention or rapid fat gain.

TRENBOLON ENANTATO

Trenbolone, in its dense, long-lasting form, is one of the most effective steroids ever created. It's highly esteemed for enhancing muscle hardness and definition while boosting strength without causing unwanted water retention or fat gain. This form delivers explosive power and strength, leading to significant growth in quality muscle mass within just a few weeks.

- Formula : $C_{25}H_{34}O_3$
- Molecular Mass : 382.54 g/mol
- Active Half-Life : 8-9 Days
- Anabolic Activity : 500%
- Androgenic Activity : 500%
- Dosage : 200-600mg per week

10ml Multi Dose Vial
Strength : 200mg / ml

BOLDINONA

- Formula : $C_{30}H_{44}O_3$
- Molecular Mass : 452.67 g/mol
- Active Half-Life : 16-17 Days
- Androgenic Activity : 50%
- Dosage : 400-1200mg per week

R_XONLY

Boldenone Undecylenate is an injectable steroid with strong anabolic and moderate androgenic effects. It enhances performance by stimulating red blood cell production and improving oxygen delivery to muscles, making it popular among bodybuilders and track athletes. Valued for promoting lean muscle growth, increasing appetite, and enhancing vascularity, it has a long active life, requiring fewer injections and making it ideal for extended cycles.

DECONATE

Boldenone Undecylenate is an injectable steroid with strong anabolic and moderate androgenic effects. It enhances performance by stimulating red blood cell production and improving oxygen delivery to muscles, making it popular among bodybuilders and track athletes. Valued for promoting lean muscle growth, increasing appetite, and enhancing vascularity, it has a long active life, requiring fewer injections and making it ideal for extended cycles.

- Formula : $C_{28}H_{44}O_3$
- Molecular Mass : 428.6472 g/mol
- Active Half-Life : 14-15 Days
- Anabolic Activity : 37%
- Androgenic Activity : 500%
- Dosage : 200-600mg per week

R_XONLY

250ml Multi Dose Vial
Strength : 100mg / ml

20ml Multi Dose Vial
Strength : 200mg / ml

MASTERONA

- Formula : $C_{20}H_{32}O_2$
- Molecular Mass : 304.47 g/mol
- Active Half-Life : 2-3 Days
- Androgenic Activity : 25%
- Dosage : 300-500mg per week

R_XONLY

Drostanolone Propionate is highly regarded for achieving lean, dense muscle with an excellent price-to-quality ratio. With a half-life of about 1-1.5 days, it acts much faster than Drostanolone Enanthate, making it ideal for shorter and cutting cycles.

TESTO CYPONATO

Testosterone Cypionate is widely recognized as one of the most effective mass-building anabolics and is highly recommended as the foundation of any mass-building cycle. It promotes overall health and well-being by enhancing libido, energy, and immunity, while also aiding in fat loss, maintaining lean muscle mass, preventing osteoporosis, preserving bone density, and potentially protecting against heart disease. This versatile steroid combines well with various other compounds, both oral and injectable, to create a powerful stack.

- Formula : $C_{27}H_{40}O_3$
- Molecular Mass : 412.6 g/mol
- Active Half-Life : 15-16 Days
- Anabolic Activity : 100%
- Androgenic Activity : 100%
- Dosage : 300-1500mg per week **R_XONLY**

10ml Multi Dose Vial
Strength : 100mg / ml

10ml Multi Dose Vial
Strength : 250mg / ml

TESTO ENANTATO

- Formula : $C_{26}H_{40}O_3$
- Molecular Mass : 400.59 g/mol
- Active Half-Life : 7-8 Days
- Androgenic Activity : 100%
- Dosage : 250-1500mg per week

R_XONLY

Testosterone Enanthate is a top mass-building anabolic, ideal as the foundation of any mass-building cycle. It boosts libido, energy, and immunity, aids fat loss, maintains lean muscle mass, and helps prevent osteoporosis and bone density loss. Additionally, it may protect against heart disease. It combines well with various oral and injectable compounds, making it a versatile addition to any stack.

TEST PROPINATO

Testosterone Propionate is a fast-acting anabolic steroid ideal for enhancing muscle mass, strength, and overall athletic performance. With a shorter half-life, it requires more frequent injections but allows for quick results, making it popular for cutting cycles. It boosts libido, energy, and fat loss while supporting lean muscle maintenance.

- Formula : $C_{22}H_{32}O_3$
- Molecular Mass : 344.49 g/mol
- Active Half-Life : 2-4 Days
- Anabolic Activity : 100%
- Androgenic Activity : 100%
- Dosage : 200-700mg per week

R_XONLY

10ml Multi Dose Vial

Strength : 100mg / ml

STANOZOLO

- Formula : $C_{21}H_{32}N_2O$
- Molecular Mass : 328.49 g/mol
- Active Half-Life : 7-8 Days
- Androgenic Activity : 320%
- Dosage : 300-600mg per week

R_XONLY

Stanozolol is a synthetic steroid similar to the naturally occurring hormone testosterone. It is used to treat hereditary angioedema, a condition that causes swelling in the face, extremities, genitals, bowel wall, and throat. Stanozolol can help reduce the frequency and severity of these swelling episodes.

TRENBOLAN HEXANO

renbolone hexahydrobenzylcarbonate is a synthetic injectable steroid belonging to the group of anabolic androgenic steroids, specifically the C17b hexahydrobenzylcarbonate ester of Trenbolone. It was once approved for medical use in humans in France but has since been discontinued.

- Formula : $C_{26}H_{34}O_4$
- Molecular Mass : 410.55 g/mol
- Active Half-Life : 6-7 Days
- Androgenic Activity : 500%
- Dosage : 100-300mg per wee

R_XONLY

10ml Multi Dose Vial
Strength : 76.5mg / ml

10ml Multi Dose Vial
Strength : 100mg / ml

PRIMOBOLAND

- Formula : $C_{27}H_{42}O_3$
- Molecular Mass : 414.6 g/mol
- Active Half-Life : 5-6 Days
- Androgenic Activity : 88%
- Dosage : 300-400mg per week

R_XONLY

Methenolone enanthate is a moderately anabolic but minimally androgenic steroid known for its versatility. It is commonly combined with stronger steroids to accelerate and amplify results. Whether used in cutting or bulking cycles, substances like Primobol and Teppert facilitate quicker recovery and the development of lean, dense muscle mass.

TESTOMIX

All forms of testosterone contribute to promoting health and well-being by enhancing libido, energy levels, immunity, and fat loss. They also help in gaining and maintaining muscle mass, preventing osteoporosis and bone density loss, and possibly protecting against heart disease. Testosterone combines effectively with many other compounds, both oral and injectable, as part of a powerful stack.

- Active Half-Life : 7-8 Days
- Androgenic Activity : 100%
- Dosage : 300-1500mg per week

SUPERA BULK-MIXO

- Formula : $C_{26}H_{40}O_3$, $C_{28}H_{44}O_3$,
 $C_{25}H_{34}O_3$
- Molecular Mass : 400.59 g/mol,
428.6472 g/mol, 382.54 g/mol
- Active Half-Life : 8-10 Days
- Dosage : 400-600mg per week

R_XONLY

Bulk Mass is designed for extreme muscle gain during bulking phases and is not recommended for beginners.

SUPERA CUT-MIXO

CutMix is a blend consisting of 50mg Trenbolone Acetate, 50mg Testosterone Propionate, and 50mg Drostanolone Propionate per injection. This unique combination of Trenbolone, Testosterone, and Drostanolone is designed for weight loss and achieving a highly ripped physique.

- Formula : $C_{22}H_{32}O_3$, $C_{20}H_{24}O_3$,
 $C_{20}H_{32}O_2$
- Molecular Mass : 344.49 g/mol,
312.4 g/mol, 304.47 g/mol
- Active Half-Life : 2-3 Days
- Dosage : 150-600mg per week
